

# Integrated Resources Planning Process

# Benefits of Stakeholder Involvement

- Improves quality of planning
- Informs the district of community concerns
- Addresses board's planning objective of including public involvement and maximizing public acceptance
- Informs and educates community about water resources, water needs, water planning objectives, and water resource options and strategies
- Increases community acceptance for district Integrated Resources Plan and resulting resource strategies

# Role of Stakeholders

- Work in close collaboration with district staff
  - To verify planning assumptions
  - Review project objectives and evaluation criteria
  - Assist in evaluation of alternatives
- Provide input and insights on issues of concern
- Provide feedback to staff on aspects of project
- Communicate IWRP information to other members of your interest group
